

AMENDMENTS TO CLAIMS:

The listing of claims will replace all prior versions, and listings of claims in the application:

LISTING OF CLAIMS:

1. (Currently amended) A ~~wrist-watch~~timekeeping device that counts a local time, ~~comprising: and that includes~~

a display device;

a time synchronization client; ~~and~~

a wireless communication device that connects the time synchronization client to an access point capable of accessing a time server through a network including the Internet; ~~and;~~

a controller,

the time synchronization client transmitting a query signal for querying a time server through the network to receive a current server time from the time server,

the time synchronization client receiving a current server time from the time server, and

the time synchronization client adjusting the local time; and

~~a~~the controller to powering down said time synchronization client at least some of the time during which said time synchronization client is not transmitting said query signal.

2-5. (Cancelled)

6. (Currently amended) The ~~wrist-watch~~timekeeping device of Claim 1, further ~~including~~comprising a transmitter for wirelessly transmitting said query signal to said access point.

7-9. (Cancelled)

10. (Currently amended) The ~~wrist-watch~~timekeeping device of Claim 1, further ~~including~~comprising a memory for storing time zone information and a controller for adjusting the local time based on said time zone information.

11-24. (Cancelled)

25. (New) The timekeeping device of Claim 1, wherein the wireless communications device uses short-range wireless communications when the access point is located a short distance away from the timekeeping device.

26. (New) The timekeeping device of Claim 1, wherein the wireless communications device uses long-range wireless communications when the access point is located a long distance away from the timekeeping device.
